
Institute for the Management and Economics of Education

The Institute for the Management and Economics of Education is a university institute, which contributes to research and knowledge transfer in the fields of the management and economics of education.

Besides engaging in research and development, the Institute's aim is to provide services to teachers, school leaders, representatives of communities, cantons, ministries, and authorities as well as individuals in charge of the quality and development of educational institutions.

Our funding partners and customers are (besides the classic research foundations) above all the federal government, the cantons, communities, associations, counselling agencies, private foundations, education institutions (among them also universities), in Switzerland and the other German speaking countries, but also in other European and non-European countries, and international organisations such as the OECD.
